For detailed information regarding Rochester, New York demographics, please visit http://www.city-data.com/city/Rochester-New-York.html. The University of Rochester is a non-sectarian, co-educational private institution currently serving some 10,500 students. For detailed information regarding University of Rochester demographics, please visit the University's Factbook at http://www.rochester.edu/provost/ir/ .

This document is designed for the purpose of providing information to our stakeholders regarding metrics related to the operation of our three counseling programs accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). These three accredited program areas include: the M.S. in School Counseling, the M.S. in Community Mental Health Counseling, and the collective Ed.D. and Ph.D. level doctoral programs in counseling. These statistics are based on calculations amassed at the start of the 2015-2016 academic year.

M.S. in School Counseling
a) Number of currently enrolled students   19.0
b) Number of program graduates from the past year   17.0
c) Completion rate*   83.85%
d) Licensure or certification examination pass rate**   92.5%
e) Job placement rate***   46.15%

M.S. in Community Mental Health Counseling
a) Number of currently enrolled students   58.0
b) Number of program graduates from the past year   17.0
c) Completion rate*   65.0%
d) Licensure or certification examination pass rate**   94.7%
e) Job placement rate***   75.0%

Collective Statistics for Ph.D. and Ed.D. Counseling Programs**

a) Number of currently enrolled students   53.0
b) Number of program graduates from the past year   3.0
c) Completion rate*   47.65%
d) Licensure or certification examination pass rate**   N/A
e) Job placement rate***   100.0%

*Completion rate is defined as the percentage of admitted students who graduate from the program within the expected time period. In the case of master's level students we estimated that a full time student would ideally graduate within a 2-calendar year period (plus summers) and that a part-time student would complete in 4 calendar years (plus summers). In the case of doctoral programs, we considered an ideal full-time completion rate to be 5 calendar years (plus summers) and a part-time completion rate to be 8 years. Please note that this calculation is not a reflection of retention rate, but rather is a calculation of students who complete during a prescribed time period.

**Currently, in New York State, no counseling-related examination exists for School Counselor certification. However, school counseling students are allowed to take the National Counselors Exam. The data reported for school counselors are for those who elect to take the NCE. Although there is a licensure examination for Mental Health Counselors, individual programs are not granted statistics from the state on their students or graduates. Again, the data reported here are for those who elect to take the NCE.

*** The following is a quotation from the CACREP Vital Statistics Survey describing the calculation of "Job Placement Rate". Note that this calculation does not include the many graduates who obtained employment after 6 months.

Numerator: the number of students who, within 180 days of the day they received their master's counseling degree [in a given award year], obtained employment in the recognized occupation for which they were trained or in a related comparable recognized occupation.

Denominator: the number of students who, during the award year, received the master's counseling degree awarded for successfully completing the program.
