

CENTER FOR PROFESSIONAL DEVELOPMENT & EDUCATION REFORM

Making Sense of the Next Generation Learning Standards and Their Implications for Teaching Mathematics

The Next Generation Learning Standards have tremendous potential to positively impact what mathematics students learn, how students engage in mathematics, and how we, as educators, support students' learning of mathematics. Please join us for an opportunity to deepen your knowledge and understanding of the Next Generation Mathematics Learning Standards and their implications for teaching mathematics. This event will provide participants with guidance on achieving a vision of high quality mathematics instruction for all learners, and offer direction in making the transition to the NYS Next Generation Mathematics Learning Standards.

Facilitated by:
The Mathematics Education Outreach Team
Center for Professional Development and Education Reform
Warner Graduate School of Education
University of Rochester
